NAIDU PAVAN

Software Engineer (Fresher) | Full Stack Developer

Bobbili, Andhra Pradesh, India (Open to Pune / Remote) | +91 8247086869 | linkedin.com/in/naidupavan27 | github.com/NaiduPavan-git

PROFESSIONAL SUMMARY

MCA graduate (2026) and AWS Certified Cloud Practitioner with hands-on experience building, shipping and deploying full stack web applications end to end using JavaScript, Node.js, Express.js, MongoDB and SQL. Strong foundation in databases, web application architecture, REST API design and JWT-based security, with practical CI/CD and DevOps exposure through GitHub Actions. Eager to learn quickly, collaborate with mentors and write clean, reusable, high-quality code.

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, HTML5, CSS3
Web Development: Node.js, Express.js, RESTful APIs, API Integration, Responsive Web Design, Web Application Architecture
Databases: MongoDB Atlas, SQL
Cloud & DevOps: AWS (Cloud Practitioner), CI/CD, GitHub Actions, Git, GitHub, Netlify, Render, Linux (Basics)
Security: JWT Authentication, bcrypt.js, Role-Based Access Control (RBAC)
Tools & Practices: VS Code, Multer, Debugging, Troubleshooting, Problem-Solving

PROJECTS

Campus Complaint Management System 2025

Tech: Node.js, Express.js, MongoDB Atlas, JWT, bcrypt.js, Multer, HTML5, CSS3, JavaScript, Netlify, Render

- Built a responsive full stack web application with role-based access control (RBAC) for students and admins, secured with JWT authentication and bcrypt.js password hashing.
- Developed RESTful APIs with Node.js and Express.js, integrated MongoDB Atlas for cloud data storage, and implemented file uploads using Multer.
- Created an admin dashboard with complaint analytics, lifecycle tracking (Pending / In Progress / Resolved), and search and filter functionality.
- Deployed frontend on Netlify and backend on Render with GitHub-based CI/CD.

Smart Classroom Energy Management System (MCA Dissertation) 2025 – 2026

Tech: ESP32, C++, Firebase, EmailJS

- Built a real-time IoT system that collects occupancy (PIR, ultrasonic) and appliance power (ACS712) data and applies idle-power decision logic to send alerts, email the Class Representative and switch appliances off via relay.
- Built a Firebase web dashboard showing occupancy, power, relay status, idle time and alert log across multiple rooms.
- Designed and ran 10 functional test cases covering sensors, relay, Firebase sync, alerts and email; all passed.

Automated Portfolio Deployment – CI/CD Pipeline Nov – Dec 2025

Tech: HTML5, CSS3, Git, GitHub Actions, GitHub Pages

- Built a responsive portfolio website and automated deployment to GitHub Pages using GitHub Actions on every code push, with Git for version control.

EXPERIENCE

SOC Analyst Training – Savy IT Solutions Sep 2023 – Oct 2023

- Completed SOC Analyst training program in Cyber Security.

EDUCATION

MCA – Master of Computer Applications, JNTU-GV, Vizianagaram, Andhra Pradesh 2026 | CGPA: 8.02

B.Sc. Computer Science (M.P.Cs), Rajah R.S.R.K. Ranga Rao College, Bobbili 2024 | 81%

Intermediate (M.P.C), Vidwan Junior College, Bobbili 2021 | 92%

SSC, A.P. Residential School, Bobbili 2019 | 98%

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Cloud Computing and Distributed Systems – NPTEL, IIT Kanpur (Elite Certificate, 81%), Jan – Mar 2026
- Technology Job Simulation – Deloitte (Forage), Jan 2026
- Programming with Generative AI – NPTEL; Introduction to Industry 4.0 and IIoT – NPTEL
- Explore Machine Learning using Python – Infosys Springboard

ACHIEVEMENTS & ACTIVITIES

- Smart India Hackathon 2025: Proposed a campus-centric internship and placement management platform.
- GenAI Hackathon 2025: Participated at JNTUGV University in collaboration with Genaiversity.
- Class Representative: Elected during B.Sc. and MCA 1st semester.

LANGUAGES

English (Professional), Telugu (Native)
